

To the FCC.

Why are you trying to ruin Satelite Radio the same way you have done with conventional radio. Being a former broadcaster for 20 year in Southwestern Pennsylvania and seeing what deregulation and the corporated by outs did to a local radio market.

Is the reason you are doing this to is because Clear Channel and the other pro republican radio owners are putting you up to this. I thought this was a free market not a free republican market.

But what in the hell do I know.
